

# Competitive Systems and Practices

CTPM provides a pathway to significantly improve your business with potential government funding, as your personnel receive a formal qualification

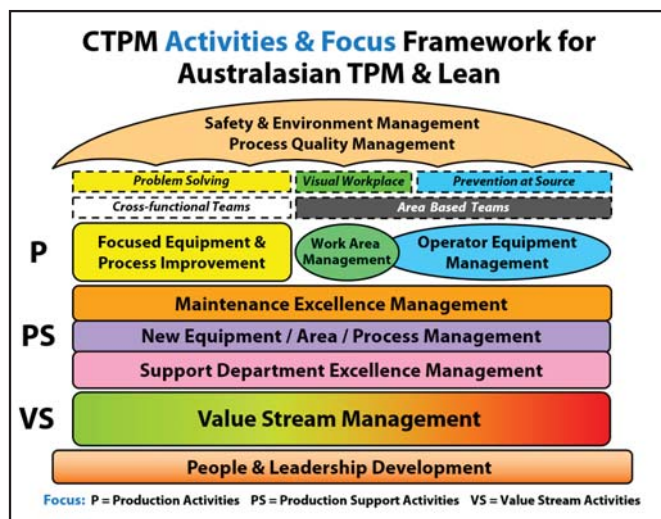

**MSS30316 Certificate III in Competitive Systems and Practices**

**MSS40316 Certificate IV in Competitive Systems and Practices**

## CTPM - Who are we?

We are a subscription-based organisation assisting companies since 1996 to strive for TPM & Operational Excellence by developing and unleashing the full potential of all their people, equipment and processes through on-site or on-line Coaching and Training support along with Public Training and Events.

## Competitive Systems and Practices Qualifications are aligned with our Australasian TPM & Lean Methodology

Our unique approach links the training and assessment for the Certificate III and IV in Competitive Systems and Practices qualification to your Improvement Journey, thus allowing:

- Personnel, once enrolled to be assessed for the required units of competency while they undertake Improvement Activities as part of a team, either as a Team Member or Team Leader;
- Personnel to be formally recognised with a Nationally Recognised Qualification as they contribute to the company's strategically driven improvement initiative, rather than just complete a series of often ad-hoc projects to satisfy their training requirements; and
- Practical assessments in the workplace rather than post training assessments in the classroom.

Australasian TPM & Lean is a holistic approach to improvement ultimately involving all personnel. As such all personnel within the sites factory or office can complete the qualifications.

## Reward your people

Develop the knowledge and skills of your people within the workplace as they progress the organisations strategically driven improvement journey
