

CTPM Appoint new Navigator in WA!

CTPM has been assisting Western Australian companies since 1996 to envisage and strive for Operational Excellence through the on-going development of their people as they improve the performance of their equipment and processes using our Australasian approach to TPM & Lean / CI.

We have had a local Navigator in Perth on and off since 1996, however with the need to better service the ever changing market CTPM has appointed a new Senior Navigator / CI Specialist by the name of **Craig Elliott**.

Craig, who is based in Perth, brings great experience and knowledge to the CTPM Team. He is an experienced **Lean advocate who is passionate about achieving Operational Excellence**. We are very confident in his abilities to add value and support to the TPM & Lean /

CI Journey of companies striving to be World Class in Operational Excellence throughout Western Australia.

Craig's educational development is of great merit with a **Bachelor of Engineering in Manufacturing Engineering** and a **Master of Science in Competitive Manufacturing** under his belt. With 12 years experience in manufacturing in both the UK and Australia, Craig started his Lean journey at BOC Edwards as a Manufacturing Engineer and progressed to Project Management.

In 2007 Craig moved to Australia and began working for WA Specialty Alloys as a Project Engineer focusing on delivering operational improvements. Following on from that, he owned and operated a successful commercial aluminium window supplier for 3 years before selling his business to join Gliderol Garage Doors as an Operations Manager.

After some initial training, Craig formally started with CTPM in early September 2015. To bring him up to speed with our latest learnings and broad range of support material, Craig will also be attending CTPM's 3-day TPM & Lean / CI Advanced Training workshop with clients from WA, NSW and NZ on the 13-15 October in Wollongong. Early in 2016 Craig will complete CTPM's development process by also attending our 5-day intensive live-in CI Leadership / Instructor's Course.

In the mean time Craig will be supporting Goodman Fielder Bakery in Malaga WA to kick-off their Continuous Improvement journey. He has already taken part and supported our President Ross Kennedy in delivering an in-house 2-day Getting TPM & Lean / CI to Sustain workshop to the site, as well as a Site Leadership Team Introduction Strategy workshop and a CI Awareness Training workshop. With Cycle 1 of their TPM & Lean / CI Journey starting off shortly, Craig is well equipped for the challenges ahead.
